SUMMARY

Mission-driven Full Stack Developer with exceptional communication and collaboration skills. Quick to master new technologies and facilitate resolutions. Committed to self-improvement and uplifting team performance. Seeking a growth-oriented organization to leverage my dedication, adaptability, and strong work ethic.

EXPERIENCE

NTx Ventures | Sparks, CA

Full-Stack Developer | 03/2023 - Present

- Rebuilt an interactive data visualization platform with a mobile-friendly UI in two months, saving \$15K and boosting client satisfaction by 25%, demonstrating a commitment to enhancing user experience and delivering quality results.
- Developed a web scraping platform, improving diagnostics by 45% and optimizing workflows, saving 15 hours weekly.
- Integrated advanced web scraping tools and automated data collection, improving efficiency and resolving data bottlenecks.
- Led front-end development of SEO/SEM applications, collaborating with UX/UI designers to analyze and visualize competitor data, highlighting effective teamwork and communication.
- Automated VIN database processes, enabling efficient uploads of over 100K records to an SQL server for quick retrieval of detailed vehicle information, illustrating a drive to enhance system performance and user capabilities.
- Liaised effectively with both technical and non-technical stakeholders, demonstrating strong communication skills and the ability to bridge gaps between different teams.

ChartRequest | Anaheim, CA

Junior Full-Stack Developer | 08/2022 - 03/2023

- Developed an intuitive legal interface for managing medical record documents, increasing user efficiency by 20% and streamlining document handling.
- Migrated payment systems to Stripe, improving transaction speed by 40% and enhancing integration with existing systems.
- Resolved multi-language PDF generation issues, supporting 20 languages and enhancing user experience in the medical request system.
- Implemented a security-focused auto sign-out feature tracking user inactivity, reducing potential security threats by 25% and ensuring compliance with industry standard

Averatist | Anaheim, CA

Entry Level Front-End Developer | 01/2022 - 08/2022

- Authored system design to migrate from plain JavaScript to a more efficient solution, resulting in a 20% acceleration in development speed. Also migrated the backend from one database system to another.
- Enhanced user experience by adopting a more efficient styling method, achieving a 50% decrease in page load times and significant improvements in Time To Interactive metrics.

Beach Coders | Anaheim, CA

Front End Dev Instructor | 02/2021 - 01/2022

- Instructed one-on-one classes on JavaScript, DS, Algorithms, and MERN stack, educating 53 unique students, highlighting a commitment to effective knowledge transfer.
